Gmail | (346) 626-9449 | USA | [LinkedIn](#) | [Portfolio](#)

Summary

Versatile Full Stack Developer with 3+ years of strong experience in designing, developing, and deploying scalable web applications and microservices. Skilled in full-stack development, cloud computing, DevOps, and AI integration. Proficient in modern frameworks, programming languages, and CI/CD practices. Committed to building secure, high-performance systems and delivering impactful, user-centric software solutions.

Technical Skills

- Programming & Frameworks:** Java, JavaScript, TypeScript, Kotlin, Python, SQL, HTML5, CSS3, React, React Query, Angular, Vue.js, Spring Boot, Spring WebFlux, Spring Cloud, Spring Security, Hibernate, Thymeleaf, JSP, Node.js, Express.js, Bootstrap, Tailwind CSS, FastAPI, Flask, Celery, QueryDSL
- Databases & Data Management:** PostgreSQL, MySQL, MongoDB, Cassandra, Redis, Apache Kafka, Apache Flink, Elasticsearch, Firebase, GraphQL, Pinecone, Weaviate, FAISS, Oracle SQL, PL/SQL, Azure SQL
- Cloud Platforms & DevOps:** AWS (Lambda, API Gateway, Cognito, Fargate, CloudWatch, X-Ray, CodePipeline, CodeBuild, SNS, WAF, Shield, EKS), Azure (AKS, DevOps, Function APIs), GCP, Docker, Kubernetes, Helm, Jenkins, GitLab CI/CD, GitHub Actions, Terraform, Ansible, CI/CD pipelines
- Version Control & Collaboration Tools:** Git, GitHub, GitLab, Bitbucket, Jira, Confluence, Slack, Trello
- Testing & Quality Assurance:** JUnit, TestNG, JUnit 5, Mockito, Pytest, Cypress, Selenium, Postman, Swagger, SonarQube, JaCoCo, AssertJ, JMeter
- Security & Authentication:** OAuth 2.0, JWT, OpenID Connect, SSL/TLS, SAML, AWS WAF & Shield, HTTPS, CORS, CSRF, XSS, SQL Injection Prevention, Role-Based Access Control (RBAC), SSO integration
- Architectural Patterns & Design:** Microservices, RESTful APIs, SOAP, Azure Function APIs, Event-Driven Architecture, Serverless Architecture, Domain-Driven Design (DDD), MVC, Singleton, Factory, Observer, Strategy, Repository, Dependency Injection, Reactive APIs
- UI/UX & Responsive Design:** Responsive Web Design, Material-UI, Ant Design, Figma, Adobe XD, Sketch, Webpack, Babel, SASS, LESS
- Agile & Project Management:** Agile Scrum, Kanban, Waterfall, Test-Driven Development (TDD), Behavior-Driven Development (BDD), Continuous Integration/Continuous Deployment (CI/CD), Pair Programming, Code Reviews
- Artificial Intelligence & Machine Learning:** TensorFlow, PyTorch, Scikit-learn, AWS Comprehend, NLP (spaCy, BERT, RoBERTa), OpenAI APIs (GPT-4/4o), GPT, LLaMA, Claude, LangChain / LlamaIndex, RAG, AI service integration in backend applications, LLaMA 3, Fine-tuned models
- Soft Skills:** Analytical Thinking, Problem Solving, Effective Communication, Team Collaboration, Adaptability, Time Management, Leadership, Conflict Resolution, Stakeholder Management

Professional Experience

Full Stack Developer, Citizens Bank

10/2024 – Present | Remote, USA

- Worked on an AI-powered financial advisor chatbot for Citizens Bank's digital banking platform, leveraging LLaMA 3 and spaCy to provide real-time, context-aware financial guidance, answer customer queries, and recommend banking products—enhancing customer satisfaction and reducing support ticket volume by 40%.
- Developed backend microservices in Java using Spring Boot, Spring WebFlux, and JPA with PostgreSQL. Integrated fine-tuned LLaMA 3 models through RESTful APIs to process customer queries and generate personalized financial insights.
- Created interactive dashboards with React and React Query to visualize user engagement, query categories, and chatbot performance metrics. Provided product and customer success teams with actionable insights to refine user experience.
- Implemented secure authentication and authorization using Spring Security with OAuth2 and JWT. Enabled SSO integration and fine-grained RBAC for internal tools in compliance with SOC 2 and financial-grade API (FAPI) standards.
- Built CI/CD pipelines using Jenkins and GitHub Actions, incorporating JUnit and JaCoCo for test coverage, and SonarQube for static code analysis. Used Selenium and Cypress for automated end-to-end UI testing.
- Containerized microservices using Docker and deployed to Kubernetes (Amazon EKS) with Helm charts. Integrated Kafka for asynchronous event-driven processing, and enabled observability with Prometheus, Grafana, and distributed tracing using OpenTelemetry.

Full Stack Developer, eBay

01/2021 - 07/2023 | Bengaluru, India

- Designed and developed "SmartListings," an internal tool to streamline product listing creation with features like dynamic pricing, real-time inventory sync, and bulk uploads. Collaborated with cross-functional teams for requirement gathering and scalable system delivery.
- Architected distributed microservices using Java, Spring Boot, Spring Cloud, and Spring WebFlux for reactive APIs handling listing workflows, inventory sync, and pricing logic. Used service discovery (Eureka), circuit breakers (Resilience4j), and config servers for robust inter-service communication.
- Built secure, scalable REST and asynchronous APIs integrated with RabbitMQ for event-driven operations across inventory updates, pricing triggers, and listing approvals, resulting in 50% reduction in manual sync efforts and improved system resilience.
- Developed frontend modules using React.js with lazy loading, optimized state management, and real-time backend sync for seller dashboards. Improvements led to a 30% increase in user engagement and a 25% drop in support tickets.
- Optimized database interactions using Spring Data JPA, QueryDSL, and stored procedures on Oracle SQL to support complex, high-volume transactional flows. Applied encryption, partitioning, and advanced indexing to reduce latency by 45% and ensure PII compliance.
- Led automation initiatives using JUnit 5, Mockito, Selenium, and JMeter, integrated with Azure DevOps CI/CD pipelines. Achieved 90% test coverage and cut QA cycles by 35%, improving delivery reliability across microservices.
- Collaborated with DevOps teams to orchestrate containerized deployments using Docker, Helm, and AKS (Azure Kubernetes Service). Oversaw rollout strategies, health probes, horizontal pod autoscaling, and observability integration to maintain 99.9% uptime across all environments.

Education

Master of Science in Computer Science

08/2023 – 05/2025

University of Houston-Clear Lake — Houston, USA

Bachelor of Technology in Computer Science

08/2019 – 04/2023

Koneru Lakshmaiah University — Vijayawada, India

Certificates

DevOps Engineer Expert Az-400

Microsoft Developer Associate AZ-104
